

COVID-19 Primary Care Flow Chart

Assessed as able to be managed via video/telephone
Includes covid pts

Assessed as stable and needing face to face consultation with no obvious symptoms of covid

A primary care need for a face to face assessment for a non covid reason but has mild symptoms that fulfil self-isolation advice (pt or household)
Face to face assessment of covid symptoms where direct admission to hospital is felt not to be needed
If symptoms of covid for 7 - 10 days have low threshold for hospital admission
