

Feedback from Rotherham Place Executive Team for noting at Rotherham Place ICB Committee: 15 April 2026

RPET Meeting Date	Item Discussed	Outcome
05.02.26	N/A	
12.02.26	Grant Agreement Extension	RPET considered a number of proposals to renew or extend several voluntary sector Grant Agreements due to expire during 2026–27. RPET noted the planned changes and approved the reissue and extension of Grant Agreements as set out in the paper, subject to onward sharing with the ICB CEO and CFO for transparency on decision.
12.02.26	SEND Annual Funding	Colleagues attended the SEND annual engagement meeting. Feedback from Ofsted colleagues was that there was a high level of innovation and the quality of information presented. It focused on the importance of being confident in our data when engaging with Ofsted and there had been much interest in our audits of Education, Health and Care Plans (EHCPs). Positive feedback was shared, and the formal report/letter will be circulated once received. This positive feedback will be shared with Place Board.
19.02.26	Teledermatology	RPET received a paper on Teledermatology, it outlined the increase in demand creating financial, capacity and performance pressures across primary and secondary care. Teledermatology manages approximately 75% of referrals in primary care, significantly reducing pressure on TRFT Dermatology, but rising activity has resulted in a cost pressure in 2025/26. Members were asked to approve the implementation of mandatory Teledermatology triage from April 2026 alongside demand-management actions. Barnsley Place has the same provider and work is being carried out by TRFT to align the service with Barnsley FT. RPET noted they are not able to approve the paper as it requires approval SY ICB Operational Executive. RPET recommended the proposal to OE for approval.
26.02.26	GP Haematology Guidelines	RPET ratified the guidelines approved by Clinical Referrals Management Committee for use by general practice and for uploading on the website as a top tip.
