Item Number	Discussion Items
187/02/26	Place Integrated Performance Report
<p>JA provided an overview of current performance against ICB priorities highlighting:</p> <ul style="list-style-type: none"> – Performance against the 4-hour UEC standard remained challenged, with an actual position of 65.9% against a target of 78%. – Category 2 ambulance response times continued to meet the 30-minute standard, reflecting good performance. – Bed occupancy was reported at 92%, in line with the target. <p>Handover performance showed a slight deterioration, although the 15-minute target was largely being achieved. Community waiting times of over 52 weeks remained an area of concern.</p> <p>Virtual ward performance continued to fluctuate, with improvement activity ongoing to support delivery against targets. Primary care delivered the highest number of appointments despite ongoing pressures, and patient experience within general practice remained strong.</p> <p>Diagnostic activity continued to increase but remained below the target position. Performance against the 18-week standard showed improvement. The cancer 28-day standard was achieved at 82.1%, representing a deterioration from the previous period, while performance against the 62-day standard remained challenging, with mitigating actions in place.</p> <p>Data timeliness issues were noted in relation to cancer diagnosis, and the 31-day standard was not being met; mitigating actions were being progressed at both local and system levels.</p> <p>Members noted that overall, the system remained in a challenged position across multiple performance areas.</p> <p>Place Board noted this month's performance.</p>
